Wellbeing is our number one priority

ONE PEMBROKE has been designed with employee comfort and convenience at its heart. A wraparound penthouse terrace, as well as landscaped terraces on each upper level, and a panoramic rooftop, make the most of the building's breath-taking open views and promote employee wellness with easy access to outdoor space; to meet, relax, or catch up over lunch.

Natural daylight and ventilation are maximized throughout the building, with large office spaces, sizeable openable windows and seated outdoor areas.

A large café with outside seating provides space for meetings, breaks and lunchtime chats.

Comfort for commuters

With health and wellbeing at the forefront of occupier experience, ONE PEMBROKE delivers thoughtful end-of-trip spaces, encouraging healthier commuting choices and active travel.

Best in class end-of-trip facilities

14 shower suites with spacious changing facilities

Vanity space within each changing area

169 secure bicycle spaces and lockers, both double and single stacker system

Drying room facilities

Designated **cargo bike** spaces

Bike servicing and **repair station**

Electric charge facilities for e-bike users

Designed to **WELL Building accreditation principles**

Outline Specs

GENERAL

- High quality Grade A building finishes and specifications
- Unitized glazed system with integrated brick-faced insulated panels
- Double height reception
- Building Energy Management System
- High-Efficiency Glazing to minimize Solar Gain and maximize natural light
- Full sprinkler protection to building with automatic operating vents to stair core and glazed side walls
- Adequate plant space for tenant fit out
- Fossil Free Operations / Fully Electric

CAT A OFFICES

- Suspended perforated metal ceiling tiles 600mm x 600mm
- Energy Efficient LED lighting throughout with automatic daylighting control (automatic dimming) and combined PIR detection
- High efficiency air source heat pumps serving water side control 4 pipe fan coil units
- Painted proprietary plasterboard partitions
- Raised access floor
- Heat Recovery in heating and cooling mode, variable speed driven, roof mounted AHUs
- Capacity for floor subdivision
- Efficient floor plates to cater for open plan and cellular accommodation
- Limited number of columns

OFFICE FLOOR LOADING

- Office floors: 3kN per sq m. (plus 1kN per sq. m. partitions)

COMMON AREAS

- Fully completed common areas to exceptionally high standards throughout
- Impressive double height reception area
- Fully completed lift lobbies with high quality floor and wall finishes
- Fully completed toilet areas with high quality floor and wall finishes (1 person per 10 sq.ft.)
- 14 high quality end of trip showers with changing and drying room facilities.
- 5,873 sq.ft. of external terraced spaces.

BUILDING TARGETS

- BER A2
- NZEB Compliant
- LEED Platinum V4 Shell + Core
- WELL Gold Standard
- Wired Score Platinum
- Target Smart Building Enabled
- Net Zero Carbon 2030 (operational) Compliant
- Embodied Carbon LETI 2030 Compliant

OFFICE

- Means of escape: 1 person per 6 sq.ft.
- Internal climate: 1 person per 10 sq.ft.
- Lift provision: 1 person per 10 sq.ft.
- Sanitary provision: 1 person per 10 sq.ft.
- Toilet ratio: 60% male & 60% female provision to BS6465-1 2006 + A1 2009

FLOOR HEIGHTS

- Reception double-height floor to ceiling height: 7.60m
- GF floor to ceiling height: 3.90m
- General office slab to slab height: 3.70m
- General office floor to ceiling height: 2.75m
- Raised floor zone: nominal 150mm (top structural slab to top of finished floor level)
- Ceiling zone: nominal 550mm (underside of structural slab to finished ceiling level)

STRUCTURE

- The structure for proposed office development will comprise a reinforced concrete frame with post-tensioned slabs.

ACCESSIBILITY

- Step-free access is provided to the office accommodation from the internal circulation spaces
- Universally accessible WCs on each floor
- A universally accessible shower and changing room is provided at basement level adjoining the lift lobby

MECHANICAL INSTALLATIONS

Winter Temperature:

- Outside: - 3°C db 100%RH
- Internal Office: 21°C db (+/-1°C)
- Toilets: 18°C db (minimum)
- Reception: 21°C db (+/-1°C)

Summer Temperature:

- Outside: 27°C db 65%RH
- Internal Office: 22°C db (+/-2°C)
- Toilets: 18°C db (minimum)
- Reception: 22°C db (+/-2°C)

Fresh Air Supply:

- Offices: 10 litres/second/person at 1 per 10 sq.ft.
- Toilets: 10 air changes/hour/extract plus make-up

Acoustics Level:

- Office Open Plan: NR35
- Toilets: NR40
- Staircores: NR45
- Reception Area: NR40

Water Services:

- 24-hour water storage at 45 litres/person

LIGHTING

- Offices: Energy efficient LED lighting throughout complete with automatic dimmable/daylight control and combined PIR detection
- Reception: Bespoke lighting design using LED lighting throughout to reflect high quality reception area and combined PIR detection
- Toilets: LED lighting throughout to provide a low energy lighting solution using and combined PIR detection
- Lighting Control: The main tenant lighting control system will utilise lighting control modules connected on a communication network to allow dimmable/daylight and occupancy control. The system will be programmable for reasonable modern fit-out requirements.
- Standby Power: A life safety generator will provide backup electrical supply to the life safety systems including firefighting lift, sprinkler pumps, and smoke shaft ventilation

PROTECTIVE INSTALLATION

- Fire Alarm System: Fire detection and alarm systems are in accordance with IS 3218 and designed to L2/L3MX standard in line with the fire certificate. There are individual loops to each tenant floor.
- Security Systems: An IP based CCTV system will monitor external areas, car park, bicycle park, lift lobbies and the entrance foyer. Access control will be provided at main access points to the building.

MECHANICAL

- Design occupancy 1 person per 10m2 and 10 L/s per person fresh air
- Net Zero Carbon 2030 (operational) compliant LETI 2030.
- No fossil fuels used on site
- High efficiency air source heat pump to produce LPHW
- High efficiency water cooled chillers with dry coolers and 100% free cooling capacity to produce CHW
- Central fresh air with integral heat pumps and return air heat exchange
- Dedicated fresh air AHUs to cores – no transfer air from office to core
- Dedicated high efficiency heat pump for domestic hot water
- Rainwater harvesting for WC flushing to reduce water consumption
- Embodied Carbon LETI 2030 compliant.

LIFTS

- Min 15-person high performance passenger lifts
- Average waiting time < 25 seconds – BCO compliant
- Destination control integrated with access control

ELECTRICAL

- Dedicated ESB Substation
- Options for LV supply for multi tenants or MV supply for single tenant
- Option for full load tenant generator
- LED lights throughout
- Daylight harvesting on general office lights
- Building management control system open protocol to allow interface with the following:
 - Lighting control
 - Access control – Security
 - Fire alarm
- Smart building enabled
- Access control and security system provided and expandable for tenant use
- Solar photovoltaic (PV) power generation
